

Introduction to structural equation modeling

Frank Pennekamp

10/19/2021

Introduction of the team

- ▶ Dr. Frank Pennekamp (main instructor)

Swiss SEM team:

Dr. Noémie Pichon, Dr. Fletcher Halliday, Dr. Eliane Meier,
Dr. Hugo Saiz, Dr. Debra Zuppinger-Dingley, Rebecca Oester,
Annabelle Constance, Fabienne Wiederkehr, Dr. Rachel Korn,
Dr. James Grace, Dr. Frank Pennekamp

Introduction of the team

- ▶ Dr. Frank Pennekamp (main instructor)
- ▶ Dr. James Grace (advanced topics and model clinic)

Swiss SEM team:

Dr. Noémie Pichon, Dr. Fletcher Halliday, Dr. Eliane Meier,
Dr. Hugo Saiz, Dr. Debra Zuppinger-Dingley, Rebecca Oester,
Annabelle Constance, Fabienne Wiederkehr, Dr. Rachel Korn,
Dr. James Grace, Dr. Frank Pennekamp

Introduction of the team

- ▶ Dr. Frank Pennekamp (main instructor)
- ▶ Dr. James Grace (advanced topics and model clinic)
- ▶ Dr. Rachel Korn (course development)

Swiss SEM team:

Dr. Noémie Pichon, Dr. Fletcher Halliday, Dr. Eliane Meier, Dr. Hugo Saiz, Dr. Debra Zuppinger-Dingley, Rebecca Oester, Annabelle Constance, Fabienne Wiederkehr, Dr. Rachel Korn, Dr. James Grace, Dr. Frank Pennekamp

Schedule

- ▶ Day 1:

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables
 - ▶ Interactions

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables
 - ▶ Interactions
 - ▶ Complex sampling designs

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables
 - ▶ Interactions
 - ▶ Complex sampling designs
 - ▶ Spatial autocorrelation

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables
 - ▶ Interactions
 - ▶ Complex sampling designs
 - ▶ Spatial autocorrelation
 - ▶ Discussion with James Grace

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables
 - ▶ Interactions
 - ▶ Complex sampling designs
 - ▶ Spatial autocorrelation
 - ▶ Discussion with James Grace
- ▶ Day 3:

Schedule

- ▶ Day 1:
 - ▶ General introduction to SEM to model ecological systems
 - ▶ Fitting SEMs to data
 - ▶ Model pruning, visualization and reporting
 - ▶ Discussion with James Grace
- ▶ Day 2:
 - ▶ Latent and composite variables
 - ▶ Interactions
 - ▶ Complex sampling designs
 - ▶ Spatial autocorrelation
 - ▶ Discussion with James Grace
- ▶ Day 3:
 - ▶ Self-study with possibility to meet with instructor(s)

Overview

What the course is about

- ▶ Global estimation with R package lavaan

What will not be covered

Overview

What the course is about

- ▶ Global estimation with R package lavaan
- ▶ Hands on exercises and live coding

What will not be covered

Overview

What the course is about

- ▶ Global estimation with R package lavaan
- ▶ Hands on exercises and live coding
- ▶ We will work (mostly) with a single, ecological dataset

What will not be covered

Overview

What the course is about

- ▶ Global estimation with R package lavaan
- ▶ Hands on exercises and live coding
- ▶ We will work (mostly) with a single, ecological dataset

What will not be covered

- ▶ Local estimation of SEMs (with piecewiseSEM)

Overview

What the course is about

- ▶ Global estimation with R package lavaan
- ▶ Hands on exercises and live coding
- ▶ We will work (mostly) with a single, ecological dataset

What will not be covered

- ▶ Local estimation of SEMs (with piecewiseSEM)
- ▶ Advanced topics like incorporating random effects, feedbacks, temporal autocorrelation

Learning objectives

- ▶ Participants understand the benefits and limits of SEMs

Learning objectives

- ▶ Participants understand the benefits and limits of SEMs
- ▶ Participants are able to fit, interpret and visualize a SEM

Learning objectives

- ▶ Participants understand the benefits and limits of SEMs
- ▶ Participants are able to fit, interpret and visualize a SEM
- ▶ Participants are able to apply SEM to their own dataset
